THE HISTORY

The concept of The Master Surgeon website originated in 2008 when Mr Dev Mittapalli created a website for medical students to distribute free practice questions and tutorials. In 2009 Mr Mittapalli joined forces with Mr Kasun Wanigasooriya who was also a part time website designer to develop the first comprehensive Master Surgeon website. The first official Master Surgeon website was launched in 2010. The new site was dynamic and included calculators, careers advice and articles, lecture power points and videos. The website received an international audience and gained popularity. The website received a further upgrade in 2014.

The vision of the website has always been to provide without exception free resources to trainees. Once the website started generating revenue through advertising Mr Mittapalli and Mr Wanigasooriya founded The Master Surgeon (TMS) Trust in 2013; a UK based charity (HMRC Ref: EW03332) which oversees the operation of The Master Surgeon website amongst other charitable medical and surgical educational activities including running free courses.

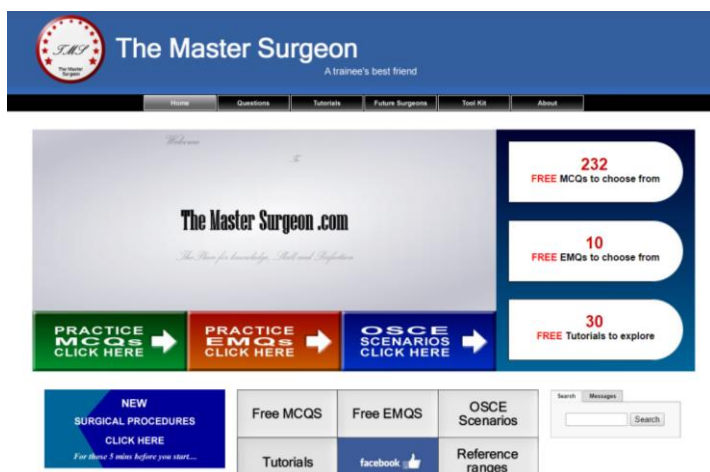

The Master Surgeon Trust is now in its 3rd year of operation. It is continuing to grow from strength to strength. We extend a special thank you to all our members who have contributed their time, their effort and dedication to make the TMS trust and its activities a success. With over 20,000 page views a month and an ever-increasing social media fan base the potential for this organisation is immense

We thank you for joining our team. We appreciate all your help, dedication, commitment and hard work. You are invaluable in helping us grow from strength to strength.
